European Parliament

PROJECT MEETING – PARICIPANTS

PROJECT MEETING

Participants looked over all Project products and analyzed what each partner had done.

We talked about what we had to do.

We also analyzed what was well improved at our schools and what should be done in the future to go on improving innovative practices at our schools

We talked about the dissemination report and about the Final report.

We also talked about the benefits and opportunities the Project brought into participant schools.

We also talked about how the English partner left the Project and about doing the meeting in Strasbourg

Partners were happy that at least after participating in European projects since 2007 (the coordinator since 1997), after a complex situation we were at the European Parliament which we visited in the afternoon

PROJECT MEETING CONCLUSIONS

Participants were happy about the Project which brings to our students opportunities to explore new ways of learning... We have concluded that Erasmus + is a big opportunity for students, teachers and schools
